Response to Amendment

In view of the amendment and the arguments filed on 11/21/05, the prior rejection of claims under 35 USC 102(e) is hereby withdrawn.

Allowable Subject Matter

Claims 1-16 and 18-32 are allowed.

1. The following is an examiner's statement of reasons for allowance: The application is allowable for the reason set forth in applicant's arguments. As noted therein, and as argued on pages 7-8, the prior art of record at least fails to teach or suggests a system and method for drilling comprising at least a fluid circulating device in the return fluid and said device providing the primary motive force for flowing the return fluid. The Moyes reference while teaches a similar arrangement, but the downhole circulation devices or turbine driven pump(s) 34, 36 are driven by the flow of mud downhole through the string bore 44 (see col. 5, lines 15-29), which does not provide the primary motive force for the return fluid as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
